

CLEARWAVE WATER SOLUTIONS

CREST

WATER FILTRATION COLLECTION

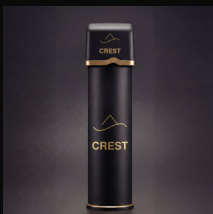

*What most companies call their best,
we call our starting point.*

The ClearWave CREST redefines what a residential water system should be. By combining premium catalytic carbon filtration with high cross-link softening resin in a single intelligent unit, the CREST eliminates hard water scale while simultaneously reducing chlorine, chloramines, and volatile organic compounds.

Engineered for city water homeowners who demand more than basic softening, it delivers comprehensive protection and refined water to every tap in your home.

KEY ADVANTAGES

- **CATALYTIC CARBON FILTRATION**
Advanced carbon media reduces chlorine, chloramines, and VOCs from every tap.
- **HIGH CROSS-LINK RESIN**
Premium resin resists chlorine degradation and outlasts standard 8% resin.
- **GARNET FILTRATION BED**
High-density garnet layer ensures clear, sediment-free water delivery.
- **INTELLIGENT METERING**
Regenerates only when needed, conserving salt and water automatically.
- **LIFETIME PROTECTION**
Lifetime warranty on tank, valve head, media, and labor. No exceptions.

Engineered to Perform.

The ClearWave CREST is not a standard softener. It is what most companies call their flagship system, and it is where our lineup begins. From the catalytic carbon bed that eliminates chemical taste and odor to the high cross-link resin that outlasts every competitor on the market, the CREST is built to protect your home for decades.

HOW IT WORKS

- 01

INTELLIGENT METERING
Water enters through the ClearWave intelligent control valve, which precisely tracks household usage and triggers regeneration only when necessary.
- 02

CATALYTIC CARBON POLISH
Water passes through a deep bed of catalytic carbon, neutralizing chlorine, chloramines, and chemical odors that dry out skin and damage plumbing.
- 03

HIGH CROSS-LINK ION EXCHANGE
Purified water flows through premium high cross-link cation resin, where calcium and magnesium ions are captured. The elevated cross-link percentage makes this resin far more resistant to chlorine breakdown than standard 8% resin.
- 04

GARNET FILTRATION POLISH
Softened water flows through a high-density garnet filtration bed at the base, providing superior flow distribution and reducing fine particulates.

BENEFITS

SPOT-FREE GLASSWARE No mineral deposits on dishes or shower doors.	SOFTER SKIN AND HAIR Filtered soft water lathers and rinses cleaner.
APPLIANCE PROTECTION Scale eliminated, extending appliance lifespan.	CHEMICAL REDUCTION Chlorine and chloramines removed at every tap.
