

PINNACLE

BY CLEARWAVE

The summit of water purity.

The ClearWave PINNACLE is the most advanced residential water treatment system available. Dual-tank architecture, six premium media stages, and 80,000 grain capacity deliver 24/7 protection that no single-tank system can match.

KEY ADVANTAGES

◆ DUAL-TANK ARCHITECTURE

Filtration and conditioning in separate vessels. 24/7 protection during regeneration.

◆ 6 PREMIUM MEDIA STAGES

Catalytic Carbon, Coconut Shell Carbon, KDF, Anti-Bacteria, Cation Resin, Garnet Filtration.

◆ 80,000 GRAIN CAPACITY

High cross-link resin delivers maximum hardness removal and extended service life.

◆ 15-23 GPM FLOW RATE

Commercial-grade flow for whole-home coverage without pressure drop.

◆ MAXIMUM CONTAMINANT COVERAGE

Chlorine, VOCs, heavy metals, hardness, nitrates, PFOA/PFOS, pharmaceuticals, and more.

Engineered to Dominate.

HOW THE PINNACLE WORKS

- 1 CATALYTIC CARBON**
Destroys chlorine, chloramines, and VOCs through catalytic oxidation.
- 2 COCONUT SHELL CARBON**
Second carbon stage captures taste, odor, and organic compounds.
- 3 KDF HEAVY METAL REDUCTION**
Copper-zinc alloy removes lead, mercury, and extends media life.
- 4 ANTI-BACTERIA PROTECTION**
Inhibits bacterial colonization throughout the media bed.
- 5 HIGH-CAPACITY CATION RESIN**
80,000 grain high cross-link resin removes calcium and magnesium hardness.
- 6 HIGH-DENSITY GARNET FILTRATION**
Final polishing stage captures fine sediment and particulates.

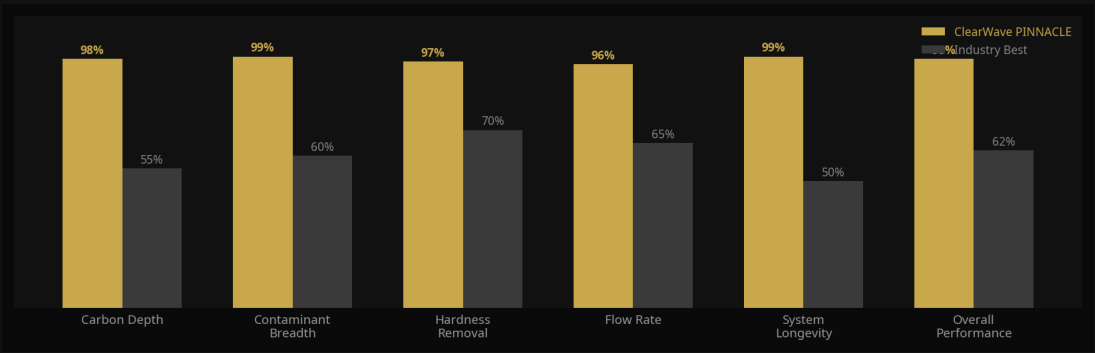

DUAL-TANK ADVANTAGE

- ◆ **24/7 PROTECTION**
Filtration continues during softener regeneration cycle.
- ◆ **ZERO COMPROMISE**
No mixing of filtration and conditioning media.
- ◆ **LONGER MEDIA LIFE**
Separated stages extend the life of each media type.

Nothing Else Comes Close.

The PINNACLE does not compete with standard water softeners. Six media stages and dual-tank architecture represent a category of one.

SYSTEM SPECIFICATIONS

Tank 1 Dimensions	10" x 54" (Filtration)	Tank 2 Dimensions	10" x 54" (Conditioning)
Service Flow Rate	15-23 GPM	Operating Pressure	40 - 90 PSI
Grain Capacity	80,000 grains*	Inlet / Outlet	1" NPT
Control Valve	Dual Clack WS1 Electronic Metered	Filtration Media	6 Premium Stages
Regeneration	Staggered demand-initiated (24/7 coverage)	Salt per Regeneration	~12 lbs

*Grain capacity customizable to higher rates based on household demand.

CONTAMINANT REDUCTION PROFILE

- ◆ Chlorine and Chloramines
 - ◆ Heavy Metals (Lead, Mercury, Copper)
 - ◆ Nitrates and Sulfates
 - ◆ PFOA and PFOS
 - ◆ Anti-Bacteria Protection
- ◆ Volatile Organic Compounds (VOCs)
 - ◆ Hard Water Minerals (Ca, Mg)
 - ◆ Pharmaceuticals
 - ◆ Free Radicals
 - ◆ Taste and Odor Compounds

WHY CHOOSE THE PINNACLE

- ◆ **24/7 FILTRATION GUARANTEE**
The dual-tank design ensures your family always has filtered water, even during regeneration. No other residential system offers this.
- ◆ **MAXIMUM CONTAMINANT COVERAGE**
Six media stages cover every category: chemical, biological, heavy metal, hardness, sediment, and emerging contaminants.
- ◆ **BUILT TO LAST A LIFETIME**
Dual Clack WS1 valves, premium high cross-link resin, and commercial-grade media deliver decades of peak performance.

Protected for Life.

CLEARWAVE LIFETIME WARRANTY

- TANK**
Lifetime coverage on both pressure vessels. No degradation, no exceptions.
- VALVE HEAD**
Full lifetime coverage on both Clack WS1 electronic metered control valves.
- MEDIA**
All six filtration and conditioning media stages covered for life.
- LABOR**
Every service call, every adjustment, every maintenance visit. Covered.

WHITE-GLOVE CONCIERGE SERVICE

- PROFESSIONAL INSTALLATION**
Factory-trained technicians handle every detail of your installation.
- ANNUAL HEALTH CHECK**
Complimentary annual system inspection and performance verification.
- PRIORITY SERVICE RESPONSE**
PINNACLE owners receive same-day or next-day service priority.
- DEDICATED ACCOUNT MANAGER**
A single point of contact for all your water quality needs.
